CHEMISTRY AND PHYSICS OF LIPIDS

Author index

Volume 96 (1998)

Arrondo, J.L.R. **96**, 53
Axelsen, P.H. **96**, 69

Baldyga, D.D. **96**, 83
Blume, A. **96**, 101
Bourque, H. **96**, 127
Brandenburg, K. **96**, 23

Dicko, A. **96**, 127
Dluhy, R.A. **96**, 83

Gómez-Fernández, J.C. **96**, 41
Goñi, F.M. **96**, 53

Hübner, W. **96**, 101

Lewis, R.N.A.H. **96**, 9

Mantsch, H.H. **96**, 3
McElhaney, R.N. **96**, 9
Mendelsohn, R. **96**, 143
Moore, D.J. **96**, 143

Pézolet, M. **96**, 127

Seydel, U. **96**, 23
Silvestro, L. **96**, 69

Villalain, J. **96**, 41

CPL
CHEMISTRY AND PHYSICS OF LIPIDS

Subject index

Volume 96 (1998)

Absorbance; Hydration state; Conformational properties **96**, 41

ATR; DPPG; FTIR; PM-IRRAS; Monolayer; Orientation measurements **96**, 127

Bilayers; FTIR spectroscopy; Frequencies **96**, 9

Binary mixtures; Phospholipids; Perdeuterated phospholipids; Monolayers; Surface pressure-area isotherms; Thermodynamics of compression; Excess free energy of mixing; Thermodynamic models; Infrared spectroscopy **96**, 83

Biomembranes; Protein-induced perturbation; Lipoproteins; Infrared spectroscopy; Lipid–protein interactions **96**, 53

Cerebrosides; FTIR; Glycolipids; Gangliosides; Lipopolysaccharides; Membrane-sugar interaction **96**, 23

C=O bands; IR spectroscopy; Vibrational modes **96**, 101

Conformational properties; Absorbance; Hydration state **96**, 41

DPPG; FTIR; PM-IRRAS; ATR; Monolayer; Orientation measurements **96**, 127

Excess free energy of mixing; Phospholipids; Perdeuterated phospholipids; Monolayers; Binary mixtures; Surface pressure-area isotherms; Thermodynamics of compression; Thermodynamic models; Infrared spectroscopy **96**, 83

Frequencies; FTIR spectroscopy; Bilayers **96**, 9

FTIR; DPPG; PM-IRRAS; ATR; Monolayer; Orientation measurements **96**, 127

FTIR; Glycolipids; Cerebrosides; Gangliosides; Lipopolysaccharides; Membrane-sugar interaction **96**, 23

FTIR spectroscopy; Frequencies; Bilayers **96**, 9

Gangliosides; FTIR; Glycolipids; Cerebrosides; Lipopolysaccharides; Membrane-sugar interaction **96**, 23

Glycolipids; FTIR; Cerebrosides; Gangliosides; Lipopolysaccharides; Membrane-sugar interaction **96**, 23

Hydration state; Absorbance; Conformational properties **96**, 41

Infrared spectroscopy; Phospholipids; Perdeuterated phospholipids; Monolayers; Binary mixtures; Surface pressure-area isotherms; Thermodynamics of compression; Excess free energy of mixing; Thermodynamic models **96**, 83

Infrared spectroscopy; Protein-induced perturbation; Lipoproteins; Lipid–protein interactions; Biomembranes **96**, 53

IR spectroscopy; C=O bands; Vibrational modes **96**, 101

Lipid–protein interactions; Protein-induced perturbation; Lipoproteins; Infrared spectroscopy; Biomembranes **96**, 53

Lipopolysaccharides; FTIR; Glycolipids; Cerebrosides; Gangliosides; Membrane-sugar interaction **96**, 23

Lipoproteins; Protein-induced perturbation; Infrared spectroscopy; Lipid–protein interactions; Biomembranes **96**, 53

Membrane-sugar interaction; FTIR; Glycolipids; Cerebrosides; Gangliosides; Lipopolysaccharides **96**, 23

Monolayer; DPPG; FTIR; PM-IRRAS; ATR; Orientation measurements **96**, 127

Monolayers; Phospholipids; Perdeuterated phospholipids; Binary mixtures; Surface pressure-area isotherms; Thermodynamics of compression; Excess free energy of mixing; Thermodynamic models; Infrared spectroscopy **96**, 83

Orientation measurements; DPPG; FTIR; PM-IRRAS; ATR; Monolayer **96**, 127

PII S0009-3084(98)00097-8

Perdeuterated phospholipids; Phospholipids; Monolayers; Binary mixtures; Surface pressure-area isotherms; Thermodynamics of compression; Excess free energy of mixing; Thermodynamic models; Infrared spectroscopy **96**, 83

Phospholipids; Perdeuterated phospholipids; Monolayers; Binary mixtures; Surface pressure-area isotherms; Thermodynamics of compression; Excess free energy of mixing; Thermodynamic models; Infrared spectroscopy **96**, 83

PM-IRRAS; DPPG; FTIR; ATR; Monolayer; Orientation measurements **96**, 127

Protein-induced perturbation; Lipoproteins; Infrared spectroscopy; Lipid–protein interactions; Biomembranes **96**, 53

Surface pressure-area isotherms; Phospholipids; Perdeuterated phospholipids; Monolayers; Binary mixtures; Thermodynamics of compression; Excess free energy of mixing; Thermodynamic models; Infrared spectroscopy **96**, 83

Thermodynamic models; Phospholipids; Perdeuterated phospholipids; Monolayers; Binary mixtures; Surface pressure-area isotherms; Thermodynamics of compression; Excess free energy of mixing; Infrared spectroscopy **96**, 83

Thermodynamics of compression; Phospholipids; Perdeuterated phospholipids; Monolayers; Binary mixtures; Surface pressure-area isotherms; Excess free energy of mixing; Thermodynamic models; Infrared spectroscopy **96**, 83

Vibrational modes; IR spectroscopy; C=O bands **96**, 101
